

Walraven VibraTek® PR-T Rubber Tile Pad

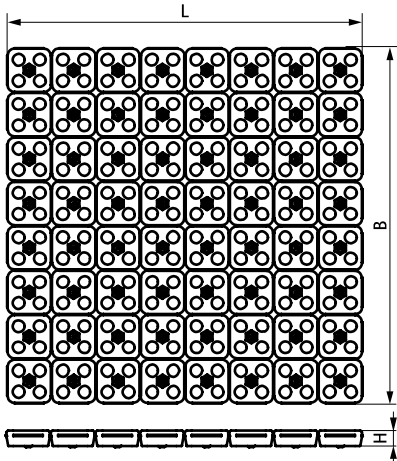

(L2 05 72)

a versatile rubber tile pad for general vibroacoustic isolation applications

Features and Benefits

- ideal for use as an elastic isolating support for equipment and metal structures
- individual 50x50mm pieces can be easily cut to form required support shape
- transforms to elastic base support when used with a hexagon head screw
- hardness 45 shore A
- working temperature range -20 °C till 90 °C
- reusable in the event of machine relocation
- simple to cut and install
- supplied as a mat of 64 blocks (8x8) joined by a membrane
