

Tangit Unilock Screw thread Sealing

(Y 10 05)

sealing of screw thread

Features and Benefits

- immediate sealing of water, gas and compressed air lines
- no further tools or sealing material necessary
- ready for use from the dispenser and easy to apply
- for threaded connections to 6" (168.3 mm) of metal (steel, stainless steel, cast iron, etc.) or plastic (PVC-U, PVC-C, PP, PE)
- for conical as well as cylindrical connections
- resistant in combination with:
 - cold and hot drinking water applications (up to 16 bar with max. temperature of +85 °C)
 - hot water applications (up to 7 bar with max. temperature of +130 °C)
 - mains gas applications (up to 5 bar with temperature from -20 °C to +70 °C)
- resistant in combination with:
 - natural gas
 - liquid gas (gas phase)
 - condensed gas
 - compressed air
- up to 55 % lower costs and up to 45 % faster than hemp
- according to EN 751-2
- material: PA (polyamide)
- multiple nylon rope impregnated in a solution based on silicones
- vibration- and weather resistant
- DVGW certificated
