

WTB1 Expanderbult RFR

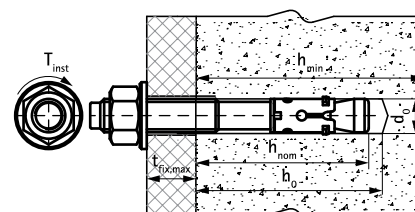

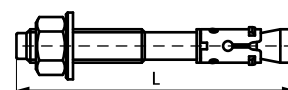

(M 95 22)

högpresterande expansionsankare i rostfritt stål för sprucken betong

Funktioner och Fördelar

- hög lastkapacitet
 - kan förmonteras eller för genomsticksmontage
 - tillverkad av rostfritt stål för användning i korrosiva miljöer
 - två infästningsdjup ger flexibilitet vid installation
 - material: rostfritt stål, A4
 - ETA Option 1 godkänd för sprucken och icke-sprucken betong
 - brandsäkerhetsklass R30-R120 för design av ankare under påverkan av brand
- Material:
 - Sprucken betong
 - Ej sprucken betong
 - sten

Kompletterande

WIS Borste
WIS Blåspump

A close-up photograph of a metal bolt and nut assembly. The bolt is silver-colored metal with a blue plastic cap on the left end. The nut is a hexagonal metal nut with a clear plastic cap on the right end. The bolt has a threaded section in the middle and a smooth section on the left. The nut has a hexagonal shape and a clear plastic cap. The background is white.

The diagram consists of a horizontal bar divided into two sections. The left section contains a red flame icon, representing fire. The right section contains a green icon of three stylized human figures, representing people. Below this bar is a large blue square containing twelve yellow stars arranged in a circle, with the letters 'ETA' in white in the center, representing the European Technical Approval mark.
